AI INSIGHTS CONSOLE
Distributed logs intelligence insights and warnings.
Model confidence increased by 2.3%
POSITIVE
OCR accuracy validated via reinforcement cycles.
No concept drift detected
STABLE
Feature data distribution matches reference baseline dataset.
Average inference latency decreased
POSITIVE
GPU core memory allocation optimization successfully completed.
Fraud predictions remain stable
STABLE
No anomalous spikes detected in the automated rule engine.

AI COMMAND PANEL
AI Assessment
Corridor analysis maps a 92% correlation with cloned FASTag patterns. Vehicle exhibits classic dual-tag fraud signature. Recommend immediate interception protocol.
AI REASONING SIGNALS
FASTag ID does not match registration state prefix (KA → DL mismatch)
Speed profile between Kundli and Panipat exceeds plausible range by 2.4σ
Same FTID detected simultaneously at two different plazas (cloned tag signature)
Plate OCR confidence drops from 99.2% to 74.3% between cameras (possible swap)
Route deviates 94% from historically observed corridor for this vehicle class
THREAT INTELLIGENCE
Fraud Score 60%
Repeat Offense 66%
Cross-Camera Match 63%
